ELSEVIER

Insurance: Mathematics and Economics 25 (1999) 415–416

INSURANCE
MATHEMATICS & ECONOMICS

Author Index Volume 25

(The issue number is given in front of the page numbers)

Berketi, A.K., Insolvency risk and its impact on the policyholders' investment choices: a mean–variance approach for participating life insurance business in UK (3) 349–372

Brockett, P.L., H-M. Chen and **J.R. Garven,** A new stochastically flexible event methodology with application to Proposition 103 (2) 197–217

Chen. H-M., see Brockett, P.L. (2) 197–217

Deelstra, G., M. Grasselli and **P.-F. Koehl,** Conditional dominance criteria: definition and application to risk-management (3) 295–306

Denuit, M., C. Genest and **É. Marceau,** Stochastic bounds on sums of dependent risks (1) 85–104

Denuit, M., C. Lefévre and **M. Mesfioui,** On s-convex stochastic extrema for arithmetic risks (2) 143–155

Denuit, M., see Dhaene, J. (1) 11– 21

Dhaene, J. and **M. Denuit,** The safest dependence structure among risks (1) 11– 21

Dickson, D.C.M. and **H.R. Waters,** Ruin probabilities with compounding assets (1) 49– 62

England, P. and **R. Verrall,** Analytic and bootstrap estimates of prediction errors in claims reserving (3) 281–293

Gaillardetz, P., see Marceau, E. (3) 261–279

Garven, J.R., see Brockett, P.L. (2) 197–217

Genest, C., see Denuit, M. (1) 85–104

Goovaerts, M. and **H. Redant,** On the distribution of IBNR reserves (1) 1– 9

Grasselli, M., see Deelstra, G. (3) 295–306

Gutiérrez-Delgado, M.C., Initial selection for Permanent Health Insurance (3) 373–385

Gómez-Déniz, E., A. Hernández-Bastida and **F.J. Vázquez-Polo,** The Esscher premium principle in risk theory: a Bayesian sensitivity study (3) 387–395

Hardy, M.R., see Wirch, J.L. (3) 337–347

Herbst, T., An application of randomly truncated data models in reserving IBNR claims (2) 123–131

Hernández-Bastida, A., see Gómez-Déniz, E. (3) 387–395

Hu, T. and **X. Pan,** Preservation of multivariate dependence under multivariate claim models (2) 171–179

Koehl, P.-F., see Deelstra, G. (3) 295–306

Lefévre, C., see Denuit, M. (2) 143–155

Lefévre, C., see Picard, Ph. (1) 105–107

Lin, X.S. and **G.E. Willmot,** Analysis of a defective renewal equation arising in ruin theory (1) 63– 84

Marceau, E. and **P. Gaillardetz,** On life insurance reserves in a stochastic mortality and interest rates environment (3) 261–279

Marceau, É, see Denuit, M. (1) 85–104

Mesfioui, M., see Denuit, M. (2) 143–155

Milbrodt, H., Hattendorff's theorem for non-smooth continuous-time Markov models. I: Theory (2) 181–195

Miltersen, K.R. and **S.-A. Persson,** Pricing rate of return guarantees in a Heath–Jarrow–Morton framework (3) 307–325

Nonnenmacher, D.J.F. and **J. Ruß,** Arithmetic averaging equity-linked life insurance policies in Germany (1) 23– 35

Elsevier Science B.V.

Pan, X., see Hu, T. (2) 171–179
Persson, S.-A., see Miltersen, K.R. (3) 307–325
Picard, Ph. and **C. Lefévre,** Corrigendum to "The moments of ruin time in the classical risk model with discrete claim size distribution" [Insurance: Mathematics and Economics 23 (1998) 157–172] (1) 105–107

Redant, H., see Goovaerts, M. (1) 1– 9
Ruß, J., see Nonnenmacher, D.J.F. (1) 23– 35

Siu, T.K. and **H. Yang,** Subjective risk measures: Bayesian predictive scenarios analysis (2) 157–169

Usábel, M.A., A note on the Taylor series expansions for multivariate characteristics of classical risk processes (1) 37– 47
Usábel, M., Calculating multivariate ruin probabilities via Gaver–Stehfest inversion technique (2) 133–142
Usábel, M.A., Practical approximations for multivariate characteristics of risk processes (3) 397–413

Verrall, R., see England, P. (3) 281–293
Vázquez-Polo, F.J., see Gómez-Déniz, E. (3) 387–395

Waters, H.R., see Dickson, D.C.M. (1) 49– 62
Willmot, G.E., see Lin, X.S. (1) 63– 84
Wirch, J.L. and **M.R. Hardy,** A synthesis of risk measures for capital adequacy (3) 337–347

Yang, H., see Siu, T.K. (2) 157–169
Yao, Y., Term structure modeling and asymptotic long rate (3) 327–336
Young, V.R., Optimal insurance under Wang's premium principle (2) 109–122
